

COURSE NAME:TOOLS AND TECHNOLOGIES FOR INTERNET
PROGRAMMING
COURSE CODE:CSE-3532

TEAM NAME:Sippy Star

TEAM MEMBERS:Tafhima Boshra(C231525),Iffat Anower Mili
Khan(C231528),Mst. Sadia Islam Tazin(C231534)

PROJECT NAME:H2O HERO.

This project is a simple **H2O HERO** that helps users keep track of their daily water intake.The goal is to drink 2 liters of water and this is represented visually through a large cup mand eight smaller cups,each holding 250 ml.When a user clicks on a small cup,it gets filled ,indicating that the corresponding amount of water has been [consumed. As](#) more cups are filled,the big cup dynamically updates to show how much water remains and how much has been drunk.The interactive design provides a clear and visual way to monitor daily hydration goals.

This project uses **HTML,CSS & JavaScript**.
